

**TROPICAL CYCLONE BULLETIN NO. 15**  
**Severe Tropical Storm NENENG (NESAT)**

Issued at 11:00 AM, 16 October 2022

Valid for broadcast until the next bulletin at 2:00 PM today

**“NENENG” FURTHER INTENSIFIES AS IT MOVES WESTWARD AWAY FROM THE BABUYAN ISLANDS**

<b>Location of Center (10:00 AM)</b>
The center of Severe Tropical Storm “NENENG” was estimated based on all available data including those from Aparri Doppler Weather Radar at <b>115 km West Northwest of Calayan, Cagayan (19.5°N, 120.4°E)</b>
<b>Intensity</b>
Maximum sustained winds of <b>100 km/h</b> near the center, gustiness of up to <b>125 km/h</b> , and central pressure of <b>980 hPa</b>
<b>Present Movement</b>
<b>Westward at 25 km/h</b>
<b>Extent of Tropical Cyclone Winds</b>
<b>Strong to storm-force winds</b> extend outwards up to <b>550 km</b> from the center

Valid for broadcast until the next bulletin at 2:00 PM today

TROPICAL CYCLONE WIND SIGNALS (TCWS) IN EFFECT			
TCWS No.	Luzon	Visayas	Mindanao
<b>3</b> Wind threat: <b>Storm-force winds</b>	<b>The southern portion of Batanes</b> (Basco, Mahatao, Uyugan, Ivana, Sabtang) and <b>Babuyan Islands</b>	-	-
	Warning lead time: <b>18 hours</b> Potential impacts of winds: <b>Moderate to significant threat to life and property</b>		
<b>2</b> Wind threat: <b>Gale-force winds</b>	<b>The rest of Batanes, the rest of Cagayan, Apayao, the northern portion of Abra</b> (Tineg, Lacub, Lagayan), and <b>Ilocos Norte</b>	-	-
	Warning lead time: <b>24 hours</b> Potential impacts of winds: <b>Minor to moderate threat to life and property</b>		
<b>1</b> Wind threat: <b>Strong winds</b>	<b>The northern and central portions of Isabela</b> (Santa Maria, San Pablo, Maconacon, Divilacan, Palanan, Ilagan City, Tumauni, Cabagan, Santo Tomas, Quezon, Delfin Albano, Mallig, Quirino, Gamu, Roxas, San Mariano, Benito Soliven, Naguilian, Burgos, Reina Mercedes, San Manuel, Aurora, Luna, Cabatuan, San Mateo, Dinapigue, City of Cauayan), <b>Kalinga, the rest of Abra, Mountain Province, the northern portion of Ifugao</b> (Aguinaldo, Alfonso Lista, Mayoyao, Hungduan, Banaue), and <b>the northern and central portions of Ilocos Sur</b> (Sinait, Cabugao, San Juan, Magsingal, Santo Domingo, San Idefonso, San Vicente, Santa Catalina, Bantay, City of Vigan, Santa, Caoayan, Narvacan, Nagbukel, Santa Maria, San Esteban, Santiago, Burgos, Banayoyo, Lidlidda, San Emilio, Quirino, Gregorio del Pilar, Galimuyod, City of Candon, Santa Lucia, Salcedo, Cervantes, Suyo, Sigay, Santa Cruz)	-	-
	Warning lead time: <b>36 hours</b> Potential impacts of winds: <b>Minimal to minor threat to life and property</b>		

**TROPICAL CYCLONE BULLETIN NO. 15**  
**Severe Tropical Storm NENENG (NESAT)**

Issued at 11:00 AM, 16 October 2022

Valid for broadcast until the next bulletin at 2:00 PM today

**HAZARDS AFFECTING LAND AREAS**

**Heavy Rainfall**

- *Until this early afternoon:* Moderate to heavy with at times intense rains likely over Apayao, Ilocos Norte, Ilocos Sur, and Babuyan Islands. Light to moderate with at times heavy rains are possible over Batanes, the northern portion of Cagayan, and the rest of Cordillera Administrative Region and Ilocos Region.
- *The rest of the day:* Light to moderate with at times heavy rains over Ilocos Norte and Ilocos Sur.
- Under these conditions, **scattered to widespread flooding and rain-induced landslides are expected**, especially in areas that are highly or very highly susceptible to these hazard as identified in hazard maps and in localities with significant antecedent rainfall.
- The trough of NENENG and the convergence of its circulation with the southwesterly winds induced by the tropical storm may also bring occasional rains today over the western portions of Visayas and MIMAROPA and the northern and western portions of Mindanao. A Weather Advisory may be issued should the potential for flooding rains further increase.

**Severe Winds**

- During the passage of NENENG, winds may reach **storm-force strength** in Babuyan Islands and southern Batanes, and winds of up to **gale-force strength** may prevail within any of the areas where Wind Signal No. 2 is hoisted. **Strong winds (strong breeze to near gale strength)** will be experienced within any of the areas where Wind Signal No. 1 is currently in effect.
- The induced southwesterly winds may also bring **occasional gusts reaching strong breeze to near gale strength** today over most of Southern Luzon and Visayas and the eastern portions of Central Luzon, especially in coastal and mountainous/upland localities of these areas.

**HAZARDS AFFECTING COASTAL WATERS**

- Under the influence of the surge of northeasterly surface wind flow, a **marine gale warning** remains in effect over the seaboard of Northern Luzon. For more information, refer to Gale Warning #14 issued at 5:00 AM today.
- The aforementioned surge and the approaching tropical cyclone may also bring **moderate to rough seas** (2.0 to 3.5 m) over the eastern and western seaboard of Central Luzon and the eastern seaboard of Southern Luzon. These conditions may be risky for those using small seacrafts. Mariners are advised to take precautionary measures when venturing out to sea and, if possible, avoid navigating in these conditions.

**TRACK AND INTENSITY OUTLOOK**

- Severe Tropical Storm NENENG will continue moving westward or west northwestward over the West Philippine Sea until tomorrow early morning, then turn and move generally west southwestward or southwestward for the remainder of tomorrow through Wednesday morning. On the forecast track, it may exit the Philippine Area of Responsibility (PAR) this late afternoon or tonight.
- Further intensification into a typhoon is likely this afternoon or tonight as it moves over the West Philippine Sea.

Considering these developments, the public and disaster risk reduction and management offices concerned are advised to take all necessary measures to protect life and property. Persons living in areas identified to be highly or very highly susceptible to these hazards are advised to follow evacuation and other instructions from local officials. **For heavy rainfall warnings, thunderstorm/rainfall advisories, and other severe weather information specific to your area, please monitor products issued by your local PAGASA Regional Services Division.**

The next tropical cyclone bulletin will be issued at 2:00 PM today.
